## Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

## Listing of Claims:

## 1-38. (Cancelled)

39. (Previously presented) A medical device, comprising:

an implantable medical stent expandable by a balloon to fix the stent in a predetermined position in contact with a body lumen wall by plastic deformation, said stent formed of a metal member in the form of a tube, said metal member having a cross-sectional thickness of about 0.0075 inch or less and formed of at least two different metals, said metal member including across said thickness a first metal portion layer, a second portion metal layer, and a third metal portion layer, wherein the first metal portion layer is formed of a first metal and the second metal portion layer is formed of a second, different metal, and wherein the density of the second metal is greater than the density of the first metal, and the second metal enhances the radiopacity of the metal member.

- 40. (Previously presented) The medical device of claim 39 wherein the third metal portion layer is formed of said first metal.
- 41. (Previously presented) The medical device of claim 40 wherein the second metal has a density of about 9.9 g/cm or more.
- 42. (Previously presented) The medical device of claim 41 wherein the second metal is Ta.

43. (Previously presented) The medical device of claim 42 wherein the first metal is stainless steel.

- 44. (Previously presented) The medical device of claim 43 including a non-metal coating on an outer surface of said metal member.
- 45. (Previously presented) The medical device of claim 44 wherein the non-metal coating is a polymer.
- 46. (Previously presented) The medical device of claim 45 wherein the metal member is a composite sheet form member configured in the form of a tube.
